Manage your business, not the other way around.

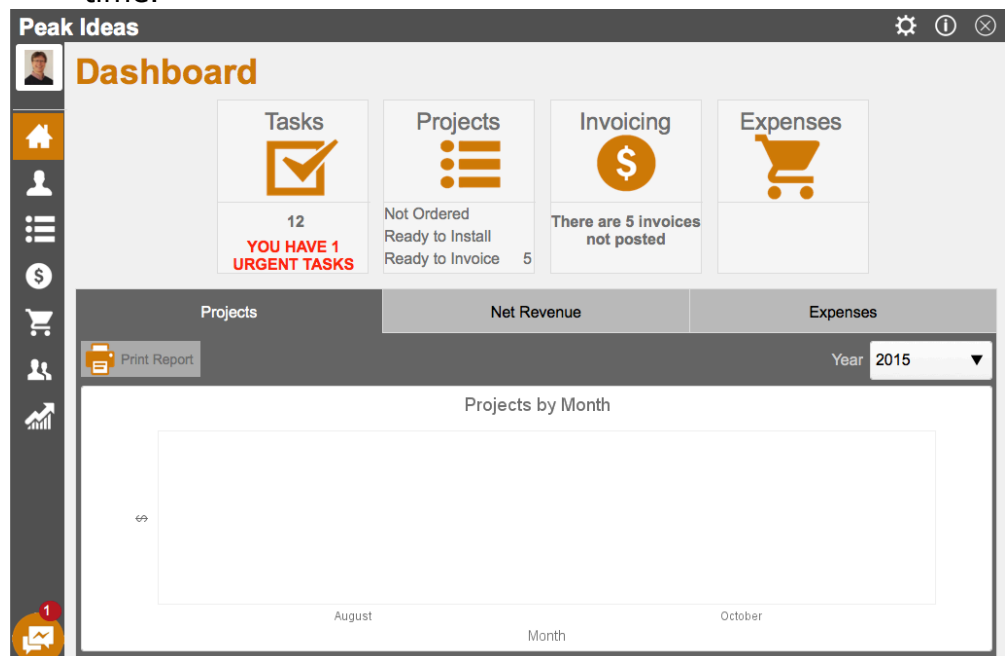

The bottom line is that Peak Design saves time, reduces costs and improves results.

Use Peak Design to organize, track and measure all activities, from initial planning and scheduling through execution. The improved visibility and control you get from Peak Design helps you use resources more effectively and strategically. Peak Design provides immediate insight into and control over progress, dependencies, spending, and variances.

Simplified View - Information at your fingertips.

The application has the same look-and-feel throughout the modules. Managers can monitor information that needs immediately attention.

- Projects that need to be invoiced.
- Projects that have reports ready.
- Projects that are over or near the budget.
- Events that need immediate attention.
- Manager Reporting on Projects, Invoices, Expenses, and Employees.
- Automatically invoice outstanding expenses, prints, and time.

Projects

With the integrated view, you can locate the project quickly utilizing the filter options.

With one glance, you can see the amount of hours that each employee has worked, how much has been invoiced and how much needs to be.

You can see the profitability of a project and which areas you are profitable in.

Dealing with change orders used to be difficult. Not anymore! Enter a change order and the associated cost and the the application automatically adds it to the costs and profit numbers.

Timecards - The easy way

Dealing with employee's time can be a chore with the best system in place. An employee enters their time for each project and the task that they were working on with some description of what they accomplished and that is it. Each week the system creates a new timecard for that employee.

Additional Features

Mobility

- Peak Design is designed with mobility at the forefront. You can access your data away from the office using the iPad or the iPhone.

Secure

- Extremely sensitive information is secure. Control who gets access to sensitive and valuable data.

Accounting

- Export to many accounting packages. Currently integrates fully with QuickBooks for Windows.

Technology Requirements

- Peak Design is simple to deploy, and has modest system requirements.
